

Order Splitter for WooCommerce

Gravity Forms plugin is used to create web forms and manage form entries within the WordPress admin. WooCommerce extension **WooCommerce Gravity Forms Product Add-Ons** used to display Gravity Forms on individual WooCommerce products.

Group by Gravity Forms Meta from Product Page

User can add meta data on product page through Gravity Forms. Order Splitter allow to split items on the basis of the meta added with Gravity Forms on product page. There method to achieve is a splitting this select **Group by Gravity Forms Meta from Product Page**.

In the following splitting method, product items meta data will be used to group the items into splitted orders. You must select meta field to define criteria for grouping items as per your requirement. In this example meta field Property Address is selected.

Group by Gravity Forms Meta from Product Page (Product items meta data will be used to group the items in splitted orders.)

New York	New York	
10009		
Bedroom(s) *	Bathroom(s) *	Approx. Interior Sq. Ft. *
2 ▾	3 ▾	1230 ▾

Items with same meta will be grouped in an order.

There are three items in the cart in this example. **Meta field** “property address” is selected on the settings page. So, items will be grouped on the basis of this meta field.

Two items 8.5x11 Brochures & 6x11 Postcards have the value **Alpha** in property address meta field and one item Floorplan has **Beta Drive** value in property address meta field.

When order will be placed, two items with the meta value Alpha will be grouped in one order and other item will be added in one order.

Cart

Product	Price	Quantity	Subtotal
8.5 x 11 Brochures Brochure Paper Type: 130# Gloss Cover with Gloss UV Brochure Qty: 25 (\$23.25) Property Type: Single Family Listing Price: \$1,111,111.00 List Date: 12/17/2021 Property Address: Alpha Manhattan New York, New York 10009 United States Map It	\$23.25	1	\$23.25
